THE LOOP

A simple experiment with onchain receipts.

SHAREBACK is an independent community token using RobinFun Stock Rewards on Robinhood Chain. Its first utility is already live: the creator-side share of trading fees is converted into the GME Stock Token, then accrued to eligible SHAREBACK holders.

01

TRADE

Buy and sell SHAREBACK through RobinFun.

02

FEE

1% trading fee. 0.5% creator side, 0.5% protocol.

03

CONVERT

Creator-side ETH is swapped into the GME Stock Token.

04

ACCRUE

Eligible holders accrue pro-rata and may claim.

FEES -> GME STOCK TOKEN -> HOLDERS

REWARD RULES

- No staking is required for Stock Rewards. Optional token staking is a separate RobinFun feature.
- Rewards follow eligible balances. Protocol addresses such as the liquidity pair, burn address, token contract, factory and staking pool are excluded from reward dilution.
- Rewards are not retroactive. Buying after a distribution does not capture earlier distributions.
- Claims and distributions are contract activity. The website publishes live totals and transaction-level receipts where available.

BUILD MAP

No fake dates. No price targets. Every step leaves a receipt.

01

LIVE

PROVE THE LOOP

- Launch SHAREBACK on RobinFun
- Activate GME Stock Rewards
- Turn the first creator fees into GME Stock Tokens
- Distribute GME and complete the first holder claims

02

WE ARE HERE

BUILD TRUST

- Publish verified live metrics
- Show volume, fees, GME purchased, distributed and claimed
- Create transaction-level SHAREBACK Receipts
- Clearly identify official contracts and project wallets
- Build trusted moderation, communication and organic community action

03

NEXT

TAKE SHAREBACK INTO THE WILD

- Maintain verified links across RobinFun, GMGN and Blockscout
- Publish automatic Fee Collector updates on X and Telegram
- Improve visibility across Robinhood Chain
- Work only with projects that genuinely fit SHAREBACK
- Make FEES -> STOCKS -> HOLDERS recognizable

CONTINUES ->

BUILD MAP

Continued: build proof, then let holders prioritize.

04

PLANNED

MAKE THE PROOF BETTER

- Build a holder claim checker
- Add personal reward history
- Expand historical statistics and analytics
- Provide public data exports and receipts
- Complete an independent contract review

05

COMMUNITY

HOLDER-LED PRIORITIES

- Transparency
- Stock Reward tracking
- Holder tools
- Community coordination
- The SHAREBACK Receipt system

Once SHAREBACK has an established community, holders help prioritize what gets built next.

**NO FEATURE GETS ADDED
JUST TO FILL A ROADMAP.**

WE KEEP BUILDING AND PROVING THE LOOP.

TRUST FIRST. MOMENTUM SECOND.

RISKS & SOURCES

Read the mechanism. Verify the contracts. Understand the risk.

IMPORTANT DISCLOSURES

- Crypto assets and tokenized assets involve significant risk and can lose some or all of their value.
- The Stock Rewards mechanism depends on RobinFun, Robinhood Chain, smart contracts, keepers, decentralized exchange liquidity, the GME Stock Token and external infrastructure. Changes, failures or restrictions may affect the mechanism.
- Robinhood Stock Tokens provide economic exposure through tokenized debt securities. They are not ownership of the underlying shares and may be subject to availability, jurisdictional restrictions and corporate-action adjustments.
- SHAREBACK is an independent community token. It is not affiliated with or endorsed by Robinhood Markets, Inc., GameStop Corp. or RobinFun.
- Nothing in this document is financial advice, an offer, a guarantee of rewards, or a promise of profit, price or value.
